

## Terminal Blocks

Our universal terminal block fits all special purpose and general purpose heads. It is easily field configurable for single or dual sensor applications and can be used with either thermocouples or RTDs. Its ceramic base protects against elevated temperatures and the brass contacts make it easy for field wiring. The block used in EHA and EHI explosion proof heads is available with thermocouple contacts.

### Universal Block

#### Order Codes:

TB102 - Universal Block - Single TC  
 TB103 - Universal Block - Single RTD  
 TB104 - Universal Block - Dual TC  
 TB106 - Universal Block - Dual RTD

### Block for EHA and EHI Heads

#### Block Order Codes:

TB202 - Block - Single TC  
 TB203 - Block - Single RTD  
 TB204 - Block - Dual TC  
 TB206 - Block - Dual RTD

\*Note: For thermocouple contacts insert calibration letter following block part number. This block can be used in a junction box and is available in a one piece construction with up to 20 points. To order follow the ordering sequence above. i.e. TB220-J is a single terminal block with 20 points for an Iron Constantan® thermocouple.

## Extensions

Nipples and unions are constructed of galvanized carbon steel as a standard construction. Adding an S to the end of the order code gets you a corrosion resistant stainless steel extension. Standard extension size is 1/2" NPT.

#### Order Codes:

N Nipple  
 NS Nipple - Stainless Steel

#### Order Codes:

NU Nipple/Union  
 NUS Nipple/Union - Stainless Steel

#### Order Codes:

NUN Nipple/Union/Nipple  
 NUNS Nipple/Union/Nipple - Stainless Steel  
 PNUN Pressure Seal in Union - Galvanized  
 PNUNS Pressure Seal in Union - Stainless Steel
